

9225 - The Multi-Tank Lube Shop Solution

For less than \$150 per tank, this low cost solution has a powerhouse of features consisting of:

- 1 Remote level information at your PC for up to five tanks via cellular transmission
- 2 Live data on a digital display panel for local readings
- 3 Alerts when your clean oil gets low and your waste oil gets high for better product management
- 4 Supplies emails when you need product to be filled or emptied

9225 - The Multi-Tank Lube Shop Solution

How it works

The Lil'Devil II monitoring unit is designed to be installed quickly and easily in a wide variety of locations for use with non-pressurized bulk tanks containing diesel fuel, motor oil, etc. Lil'Devil is a "bubbler" system and when instructed to read the tank level, the monitoring unit pumps air through the tube and measures the pressure required to force air bubbles out through the open end. Sending the information via cellular, the pressure information is used to calculate the vertical height (depth) of the fluid in the tank. Then using the tank size and geometry information stored in our database, leveldevil systems calculate the actual gallons remaining in the tank and provides a digital read of the level.

Specifications

Monitoring Capacity	5 Tanks
Tank Type	Non pressurized
Max Tank Height	18 feet
Accuracy	Better than 1% of span
Power Source	110VAC @ 20 VA
Data	Cellular
Tank Port	1/4 inch O.D. plastic tubing
Display	[Tank #] [Gallons / Inches]
Mounting Location	Inside, out of weather
Built in Tester	AC Loss
Weight	10 lbs.
Maximum Distance from Tank	1500 feet
Dimensions	9W x 6H x 4D
